

BENEFITS

Modularity

- › Team_Up provides modular solutions for supporting various forms of Smart Working using single, twin and multi-seat workstations
- › The enclosed panel bases give the user a sense of security in the open workplace, while they also increase personal comfort and provide visual serenity
- › The low, medium and high panel bases make it the perfect team workplace stimulating engagement and communication. It can be easily adapted to an individual workstation, but it also allows alternating between total concentration and group interaction
- › Team_Up is available with the tabletop height either manually or electrically adjustable, with the height adjuster concealed in the panel base. This lends elegance to the tabletops that appear to hover

Materials

- › A myriad of options available to improve acoustic qualities for better concentration and shorter reverberation periods (mini-perforations and upholstered)
- › Choices between slender 50 mm thick panel bases and sturdy 80 mm thick panel bases. You can also build on and link up using 80 mm and 50 mm thick panel bases
- › A wide range of materials available for both the 50 mm and 80 mm thick panel bases, including steel with or without mini-perforations and acoustic stuffing material, fabrics and wood print
- › Future-proof: the insertable panels are available in different colours or materials while the partition covers can be provided in a different colour
- › Monotop 18 mm thick laser edge technology worktops with sheer edges

_AHREND TEAM_UP

A handwritten signature in black ink, reading 'Marck Haans'.

Designer **Marck Haans**

“Team_Up came into being by integrating the many different forms of Smart Working, ranging from teamwork on benches through to concentrating at a workstation. I created a versatile platform that hosts a great number of configurations, thanks to its modularity. By lending versatility of application to the product, we are able to offer architects, facility managers and users a wide range of smart solutions in terms of both design and functionality, including acoustic options. Let’s Team_Up with Ahrend!”

RANGE

_AHREND TEAM_UP

Basic

- › Single workstation, twin workstation and extensions available for other modular solutions
- › Panel bases can be adjusted manually using a handle
- › Both exterior and interior of panels made of steel
- › Covers match the colour of the panels

- › Panel base can be delivered in mini-perforation, fabric and wood print styles
- › 80 mm panel base can have material up to 12 mm on each side
- › Partition in mini-perforation, fabric and wood print styles
- › Cover can be of a different colour
- › Sophisticated range of cable management and power supply accessories

Corporate Social Responsibility

Ahrend aspires to become the sector's most sustainable company in Europe and has set itself the goal of closing the full production cycles and climate-neutral manufacturing by 2020, using the principles of Ecodesign and Cradle to Cradle. The efficient use (and reuse) of materials is the central focus of this goal.
